Your Medication List:

It Can Save Your Life

Keeping an up-to-date medication list, and sharing it with your pharmacist and doctors, is a great way to help safeguard your health, says the U.S. food and Drug Administration. Be sure to include supplements and over-the counter medications in addition to prescription meds.

Talk to your healthcare team about your medical conditions, health concerns and all your medications, health concerns and all your medications. The more they know, the more can help you- and decrease your chances of taking two or more medications or supplements that can be dangerous when taken together.

Your medication list should include the dosage, reason for taking the medication and the name of the doctor who prescribed it, in the case of a prescription medication.

Request a "medicine check-up" at least once a year. Go through your medicine cabinet to get rid of old expired medicines and ask your doctor or pharmacist to go over all of the medicines you take now.

...to the Oxon Hill Bicycle & Trail Club for a generous \$500 donation. On Labor Day, the Oxon Hill Bicycle & Trail Club hosted its 18th Annual Indian Head 100. More than 900 bicyclists participated covering routes of seventeen, twenty-six, forty, fifty-six, seventy and one hundred miles.
